

Ledyard, CT
Facilities Master Plan

April 27, 2011

Feasibility Study

Design Architects:

SMMA
400 Westminster Street
Providence, RI 02903
(401) 421 0447

Cost Estimator:

Daedalus Projects Incorporated
112 South Street
Boston, MA 02111
(617) 451 2717

INTRODUCTION

Project Description:

Study evaluates; (6) school buildings, Town Hall, Police Department, (2) libraries

Renovation

Feasibility Study to analysis relative costs for capital, code, and ADA upgrades. Upgrades also include energy efficiency improvements of mechanical, electrical and IT systems.

Address hazardous material abatement and/or disposal.

Site Issues

Address access, drop-off, entrance, parking, playground, fields and service

Project Particulars:

Building Evaluation Report received April 07, 2011 from SMMA outlining the following existing conditions;

Site Issues, Architectural, Structural, Fire Suppression, Plumbing, HVAC, Electrical, Communications, Security Systems and Technology Equipment

NBV Capital Needs Assessment Report Draft dated April 08, 2011 prepared by BCA

Daedalus Projects, Inc. experience with similar projects of this nature.

Discussion and review with SMMA and their Design Team.

Project Assumptions:

Site and adjacent building(s) will be occupied during entire construction period.

Construction will be phased. A premium for out-of-hours labor expense has been included in the Main Summary.

Each Building has been considered as a separate Project within the wider collection of this Study.

Construction start date has been assumed as Summer 2012

Our costs assume that there will be competitive bidding in all trades and sub-trades i.e at least three bids per trade or sub-trade.

The Total Construction Cost reflects the fair construction value of this project and should not be construed as the prediction of the lowest bid.

Unit rates are based on current dollars with an escalation allowance to start of construction provided in the Main Summary.

INTRODUCTION

Project Assumptions: (cont'd)

Subcontractor's markups have been included in each unit rate. Markups cover the cost of field overhead, home office overhead and subcontractor's profit.

Design and Pricing Contingency markup is an allowance for unforeseen design issues, design detail development and specification clarifications.

General Conditions and Requirements value covers General Contractor's bond and site office overhead

Overhead and Profit markup is calculated on a percentage basis of direct construction costs. The value also covers General Contractor's insurance.

Project Exclusions:

Site or existing condition surveys and investigations.

Design fees and other soft costs.

Interest expense.

Owner's project administration.

Project Manager's fee

Construction of temporary facilities.

Relocation expenses

Printing and advertising.

Specialties, loose furnishings, fixtures and equipment beyond what is noted.

Building permit fees.

LEED Certification submission process.

Police details and street/sidewalk permits.

Legal Fees.

Utility back charges during construction

Owner furnished and installed furnishings and equipment, artwork, loose case goods and similar items.

MAIN SUMMARY
