Subject: Ledyard Bid 2012-8 Removal/Demolition of Gales Ferry Portable Classrooms
Date: Wednesday, September 28, 2011 12:58:00 PM

Hi:

The Asbestos and Lead Survey is available at http://ledyarddevelopment.com/GF_Bid/GF_SchAsb_Lead.pdf or in my office.

It was pointed out at the pre-bid that fluorescents, ballasts and thermostats may contain hazardous materials which need to be properly disposed. Because, as of now, no hazardous material survey has been completed, outside your base bid, please include an additional unit cost for the removal and disposal of these materials.

Thank you for participating in the pre-bid meeting.
